Reviewer's report

Title: Client satisfaction with cervical cancer screening in Malawi

Version: 2 Date: 6 August 2014

Reviewer: Jon Oyvind Odland

Reviewer's report:

I have carefully read the replies and the comments from the second reviewer.
To my point of view the authors have addressed the evaluation in a satisfactory way.
I recommend a final, detailed language washing. Then it should be ready for publication. To build literature about the increasing problem if cervical cancer in southern Africa is very important. Most of all, the message is much better related to public health issues in the new version.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:

I declare that I have no competing interests.
