Reviewer’s report

Title: Increased fairness in priority setting processes within the health sector: the case of Kapiri-Mposhi District in Zambia

Version: 3 Date: 31 May 2013

Reviewer: Francois Dionne

Reviewer’s report:

The format with pre and post description of the findings is much better. However, the findings themselves are relatively weak and there are still too many errors in the writing. The impacts found are very limited and the likelihood of confounders is high.

Level of interest: An article of insufficient interest to warrant publication in a scientific/medical journal

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
