Reviewer's report

Title: "Best" physicians' attributes: the patient's point of view

Version: 2 Date: 19 April 2004

Reviewer: Robert Veatch

Reviewer's report:

I find the revised manuscript has addressed my concerns and recommend publication without further change. Some of the methodological issues are inherent in the design and cannot be fixed, but the authors now address these issues in the manuscript. I am convinced that the methodological issues do not change the importance of the results.

What next?: Accept without revision
