Reviewer's report

Title: Technical efficiency of peripheral health units in Pujehun district of Sierra Leone: a DEA application

Version: 2 Date: 10 September 2005

Reviewer: Antonio Giuffrida

Reviewer's report:

General
The technique is well known, but the specific application is of limited value.

Major Compulsory Revisions
- The model is not well specified, as important input are not included in the analysis.
- The analysis is likely to be affected by the nature of the input variables: discrete and with very small range of variability.

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Reject because too small an advance to publish

Level of interest: An article of insufficient interest to warrant publication in a scientific/medical journal

Quality of written English: Acceptable

Statistical review: No
