Reviewer's report

Title: The influence of completing a health-related questionnaire on primary care consultation behaviour

Version: 5 Date: 3 August 2006

Reviewer: Anne F Young

Reviewer's report:

General
The authors have adequately addressed my questions and had revised the text accordingly. I recommend that the paper in its revised form be accepted.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision
