Reviewer’s report

Title: Part-time and full-time medical specialists, are there differences in allocation of time?

Version: 2 Date: 18 October 2005

Reviewer: William Weeks

Reviewer’s report:

General

----------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Briefly state that corrected for age and gender, and say how.
Eliminate most of the tables - perhaps one or two table max.
Reduce the number of words - the introduction remains far too long, the writing is clunky, and the findings are more suitable for a brief report.

----------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

----------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Unable to decide on acceptance or rejection until the authors have responded to the major compulsory revisions

Level of interest: An article of limited interest

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: No
