Reviewer's report

Title: Identifying patients at risk of nursing home admission: The Leeds Elderly Assessment Dependency Screening tool (LEADS)

Version: 2 Date: 24 January 2006

Reviewer: Michael Höfler

Reviewer's report:

General
it seems that the authors have done a good job in reviewing the paper. i have no major concerns anymore against publishing the paper.

-------------------------------------------------------------------------------
Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------
Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-------------------------------------------------------------------------------
Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision
