Reviewer's report

Title: The effects of the Two-Week Rule on NHS colorectal cancer diagnostic services: A systematic literature review

Version: 2 Date: 15 January 2006

Reviewer: William Hamilton

Reviewer's report:

The new version is much improved.

I still consider the first sentence of the discussion a non-sequitur, but as I pointed this out in my first review, and the authors presumably think otherwise, I am content to let it pass.

No further changes required.

What next?: Accept after discretionary revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
