Reviewer's report

Title: Patterns of ambulatory care utilization in Taiwan

Version: 2 Date: 29 March 2006

Reviewer: Gabriel Leung

Reviewer's report:

General
The authors have satisfactorily addressed most of my concerns.

---------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached):

---------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
I would suggest some editing for language.

---------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No
