Reviewer's report

Title: The structure of quality systems is important to the process and outcome. An empirical study of 386 hospital departments in Sweden.

Version: 2 Date: 15 June 2007

Reviewer: PY Boelle

Reviewer's report:

General

The authors have addressed and discussed the issues.

---------------------------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

---------------------------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

---------------------------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

---------------------------------------------------------------------------------------------------------------------------------------

What next?: Accept without revision

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
