Reviewer's report

Title: Healthcare in schizophrenia: effectiveness and progress of a redesigned care network

Version: 2 Date: 19 July 2007

Reviewer: Ariel Eytan

Reviewer's report:

General
The authors' responses thoroughly meet the queries and, in my opinion, the paper is much improved and easier to understand for someone without prior knowledge of the specific local context and of the Taiwanese health system.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
