Reviewer’s report

Title: The perception of healthcare quality of the elderly in the city of Bari, South Italy.

Version: 2 Date: 31 August 2007

Reviewer: Marten Lagergren

Reviewer’s report:

General
There has been considerable improvement of the article. There is only one minor comment left

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

None

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
The authors state the term "integrated home assistance" has been changed into "home care services integrated" but this has not been implemented in the text.

Discretionary Revisions (which the author can choose to ignore)
Still I believe that some results could be stated in tables instead of text

What next?: Accept after minor essential revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
