Title: The Internet for weight control in an obese sample: results of a randomised controlled trial

Version: 4 Date: 25 October 2007

Reviewer: Andrew R Willan

Reviewer's report:

General

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

I like the addition of Table II, although that is not what I meant to propose. Leave in Table II and add another table which is identical to Table I but includes only the responders.

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
