Reviewer's report

Title: Process skill rather than motor skill seems to be a predictor of costs for rehabilitation after a stroke in working age; a longitudinal study with a 1 year follow up post discharge.

Version: 2 Date: 26 March 2007
Reviewer: Jacqueline Müller-Nordhorn

Reviewer's report:

General

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

The paper largely improved by the revision and I, therefore, suggest to accept it in the present form.

As a minor comment: there are still some wording and interpunction mistakes that need revision.

What next?: Accept without revision
Level of interest: An article of importance in its field
Quality of written English: Acceptable
Statistical review: No, the manuscript does not need to be seen by a statistician.
