Reviewer's report:

General
This manuscript is well written and I think it is possible to publish without any important change.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
They should add comparison with the data of different results or the same ones with other papers especially those referenced as 17-20.

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
It is OK.

Discretionary Revisions (which the author can choose to ignore)
Nothing
