Reviewer's report

Title: Time-trend and variations in the proportion of second-eye cataract surgery

Version: 2 Date: 16 March 2007

Reviewer: Anselm Hennis

Reviewer's report:

General

Relevance of this work to public health and policy planning is clear.

-------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Major concerns have been satisfactorily addressed.

-------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Appropriate amendments have been made.

-------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
