Reviewer’s report

Title: Differences in the quality of primary medical care for CVD and Diabetes across the NHS: Evidence from the Quality and Outcomes Framework

Version: 2 Date: 22 April 2007

Reviewer: Martin Roland

Reviewer’s report:

General

------------------------------------------------------------------------
Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

None

------------------------------------------------------------------------
Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

None

------------------------------------------------------------------------
Discretionary Revisions (which the author can choose to ignore)

None

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I am actively engaged in research in this field, using some of the publicly available databases used by this group in my own research.
