Title: Integration in primary community care networks (PCCNs): examination of governance, clinical, marketing, financial, and information infrastructures in a national demonstration project in Taiwan

Version: 4  Date: 30 May 2007

Reviewer: Ingrid Mur-Veeman

Reviewer's report:

General

I have looked at the revised version of this article, especially the discussion and conclusion, and in my view the author has better explained what the results of this study are. The improvements are sufficient to allow publication, I think. It has become an interesting article about the development of collaboration in Taiwan, which is assessed according to important criteria. I suppose it is interesting for scientists and managers who are studying or working on integrated care.

----------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

----------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

----------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)
