Reviewer's report

Title: Healthcare Costs and Utilization for Alzheimer's Disease Patients

Version: 1 Date: 11 February 2008

Reviewer: Howard Fillit

Reviewer's report:

this is an excellent article that is fairly well written. to my view, it does not need changes, except for some of the discussion which could be better written. it definitely adds to our knowledge of the subject, particularly because it delineates the most common causes of admission to hospital. this is important new information.

What next?: Accept after discretionary revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
