Reviewer's report

**Title:** Developing the content of two behavioural interventions. Using theory-based interventions to promote GP management of upper respiratory tract infection without prescribing antibiotics#1:

**Version:** 1  **Date:** 3 September 2007

**Reviewer:** Lynn Weekes

**Reviewer's report:**

**General**
This paper is well written although it would benefit from an edit to reduce repetition.

---

**Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)**

The description of TPB can be briefer or eliminated as this is not not finally selected for the interventions

Discussion should include any evidence that theoretically-based interventions increase predictability of effectiveness. similarly the strengths and weaknesses of the theoretical models should be discussed.

---

**Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)**

---

**Discretionary Revisions (which the author can choose to ignore)**

---

**What next?:** Accept after minor essential revisions

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**
