Reviewer's report

Title: It's all about relationships: A qualitative study of health researchers' perspectives of conducting interdisciplinary health research

Version: 2 Date: 3 March 2008

Reviewer: Kevin Dew

Reviewer's report:

The authors have appropriately responded to all my suggestions. Additional material has been added on relevant literature, sampling procedures and the process of data analysis. I hope the authors think this has enhanced their paper - it certainly has in my opinion.

I spotted one typo on pg 20 "discipline that the come from" should be "discipline that they come from"

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
