Reviewer's report

Title: An Intervention Program to Reduce the Number of Hospitalizations of Elderly Patients in a Primary Care Clinic

Version: 3 Date: 22 November 2007

Reviewer: Steve Iliffe

Reviewer's report:

General

---------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
I think some justification of the approach to organisation change is still needed, with reference to the literature on change in primary care.

---------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

---------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

---------------------------------------------------------------

What next?: Unable to decide on acceptance or rejection until the authors have responded to the major compulsory revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
