Reviewer's report

Title: An Intervention Program to Reduce the Number of Hospitalizations of Elderly Patients in a Primary Care Clinic

Version: 3 Date: 28 November 2007

Reviewer: Gideon Caplan

Reviewer's report:

General
The manuscript has significantly improved from the re-writing. Although I am still disappointed that there is no statistical analysis, ans surprised that you could not get de-identified dat from you sick fund, I think the manuscript is now publishable.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
