Reviewer's report

**Title:** Suspected retinopathies in Norwegian optometric practice with emphasis on patients with diabetes: a cross-sectional study

**Version:** 2  **Date:** 3 December 2007

**Reviewer:** Jill E Keeffe

**Reviewer's report:**

The authors have answered the questions and addressed the issues raised by adding to the manuscript. I am happy for it to go to publication. It needs editing for spelling and the use of a plural very for the word "data".
