Reviewer’s report

Title: Socioeconomic Patient Characteristics Predict Delay in Cancer Diagnosis: a Danish Cohort Study

Version: 2 Date: 29 January 2008

Reviewer: Sue Joseph

Reviewer’s report:

I read through the revised manuscript, and the authors' comments. I agree with most of the changes, but don't agree with the authors' decision to keep all the tables, as it does not contribute additional information that could not be summarized in a very brief sentence or short paragraph. However, too much information is not as serious a flaw as too little information, and so if the other reviewers believe this manuscript should be published, I would agree with that decision.
