Reviewer's report

Title: Mortality in Dutch hospitals: Trends in time, place and cause of death after admission for myocardial infarction and ischemic stroke. An observational study.

Version: 1 Date: 6 November 2007

Reviewer: Gordon Taylor

Reviewer's report:

General
This is an interesting and well written paper. I therefore have only one very minor amendment:

Table 3: In the legend we have * P < 0. This is clearly not possible and should be changed to P<0.001.

There are also a number of places in the manuscript with double full stops. However, I will let the authors find these!

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
