Reviewer's report

Title: Variability in prescription drug expenditures explained by adjusted clinical groups (ACG) case-mix. A cross-sectional study of patient electronic records in primary care.

Version: 2 Date: 21 January 2008

Reviewer: Lee Vermeulen

Reviewer's report:

I have taken another read through the revised paper and reviewed the author's responses to my comments. I believe they have responded quite adequately to my concerns (as well as those from the other referee).

I would suggest that this paper represents a valuable addition to the existing literature on prescribing behavior, and should be accepted.
