Reviewer's report

Title: Is seeing a specialist nurse associated with positive experiences of care? The role and value of specialist nurses in prostate cancer care

Version: 2 Date: 4 February 2008

Reviewer: Pernilla Lagergren

Reviewer's report:

Discretionary Revisions
Regarding the previous major compulsory revision number 6. "The participation frequency in the survey was low. The risk of selection due to non-participation should be discussed more thoroughly in the discussions section".
Even though a participation frequency of 60% can be reasonable, there is still a high risk of selection bias, the 40% who did not respond might be older, have more advanced disease etc which I would recommend you to discuss about.

What next?: Accept after discretionary revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
