Reviewer’s report

Title: Routine care provided by specialists to children and adolescents in the United States: 2002-2006

Version: 2 Date: 5 August 2009

Reviewer: Dionne Kringos

Reviewer’s report:

Major Compulsory Revision:
1) Very little information is included about sampling frames. It is unclear how the physicians have been selected for inclusion.
2) The paper includes rather comprehensive tables. However, at times important findings from the tables are not described. The paper asks too much work from the reader to read the tables. Therefore, more guided information in the main text is needed.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
