Reviewer's report

Title: An Analysis of Rural Residents' Perceptions of the New Cooperative Medical System in Liaoning Province, China

Version: 7 Date: 23 August 2009

Reviewer: DAVID CUNNINGHAM

Reviewer's report:

this article has improved since I saw it last.

Major compulsory revisions: none

Minor essential revisions: there are still some problems with the use of English in this paper. perhaps this could be corrected by the journal. there are problems with tenses, plural/singular and also not enough use of 'the' before nouns. Some sentences could be re-arranged to read better. There are not significant however, and could be corrected quickly by someone used to medical journals, and who is fluent in English.

Discretionary revisions: none

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
