Reviewer's report

Title: Factors and typologies of general practitioner’s preferences, usage and appraisal of educational media - a German perspective

Version: 1 Date: 18 December 2008

Reviewer: François Goulet

Reviewer's report:

Good points
# Interesting and relevant publications for CME providers
# Put stats and numbers on qualitative perceptions
# Very good bibliography
# Excellent conclusions

Limitations
# Small sample: n=249. Most of them are coming from Q circles
# The physicians in the sample, Are they representative of the German general practitioner’s population?
# The article did not explain why the physicians are not internet users. Is it because of the poor availability of internet CME programs?

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
