Reviewer's report

Title: General Practitioners' Preferences and Use of Educational Media: A German Perspective

Version: 3 Date: 28 January 2009

Reviewer: Vernon Curran

Reviewer's report:

Minor Essential Revisions

Really a style issue, but sentences should not begin with numbers, e.g. in abstract under Methods 449 should be Four hundred and forty nine (N = 449).

What was response rate?

Still some issues with language usage in the Introduction. Some sentences are awkward. Other sections read well.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
