Reviewer's report

Title: Measles Outbreaks in Displaced Populations: A Review of Risk factors for transmission, morbidity and Mortality.

Version: 3 Date: 7 January 2010

Reviewer: Rebecca Grais

Reviewer's report:

I looked at the revised manuscript. There are still factual errors in the manuscript:
1) MMWR is contained within PUBMED. I don't know why the authors insist on having this be separate. It does not instill confidence in their literature search.
2) All malnutrition references need precise and clear notation. I believe the authors are categorizing malnutrition using the NCHS reference. This needs to be specified.
3) The article remains a basic overview of measles epidemiology in certain contexts, and does not add to what is already known.
