Reviewer's report

**Title:** An evaluation of health knowledge and health experiences of disadvantaged people in Eastern Nepal following participatory support.

**Version:** 1  **Date:** 4 July 2011

**Reviewer:** benjamin C ozumba

**Reviewer's report:**

An excellent article, germane, with succinct title and clear objectives. Method used for the research has been appropriate and well structured. Data collected has been adequate for the study, and has been clearly presented in the results section. The authors have discussed the issues enunciated in their aims and objective, and arrived at a conclusion which will be useful in dealing with contemporary problems. Contributors to this work have been dutifully acknowledged. This is a good article, and my verdict is publish.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** Yes, and I have assessed the statistics in my report.
