Reviewer’s report

Title: A comparative study of Taiwan’s short-term medical missions to the South Pacific and Central America

Version: 2 Date: 29 November 2012

Reviewer: Jeremy Snyder

Reviewer’s report:

The changes to the text in response to my request for clarification as to the justification for the claims in pp. 9-10 of the original manuscript were minimal. These claims remain poorly justified or, in the case of the claim that education was believed to improve knowledge, completely unsurprising.
