Reviewer's report

**Title:** Evaluating Traditional Healers knowledge and practices related to HIV testing and treatment in South Africa

**Version:** 1  **Date:** 6 September 2013

**Reviewer:** Jimoh Amzat

**Reviewer's report:**

The first reference to Table 1 regarding identification of HIV patient SHOULD be revised as the table does not reflect that. The table on PERCEIVED SYMPTOMS is more relevant in suspicion of HIV.

The authors have significantly responded to most comments made by the reviewers. I am satisfied with the current state of the paper.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** Yes, and I have assessed the statistics in my report.

**Declaration of competing interests:**

I have no competing interest
