Reviewer’s report

Title: Are modern contraceptives acceptable to people and where do they source them from across Nigeria?

Version: 6 Date: 7 January 2013

Reviewer: Mai Do

Reviewer’s report:

I only have a few minor comments:

1. Table 7: it is ok that the denominator is the total numbers of respondents in each quintile, but the authors should note in the text that the percentages are dependent on the method mix within each quintile.

2. The third paragraph from the end, under Discussion:
   
   - Please remove the sentence "This explanation has been added to the discussion."
   - The sentence before that "Strategies to promote..." would perhaps better go with the previous paragraph when the authors talked about the poorer SES not being aware of policies designed to increase their access to services.

Other than these, the authors have adequately responded to my previous comments.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
