Version: 1 Date: 6 September 2005

Reviewer: Omar Khan

Reviewer's report:

General

A useful contribution to the issue of the interplay between development, infrastructure, governance and disease. The authors do well to point out that the earlier paper may have perhaps been too reductionist in its approach.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
