Reviewer's report

Title: Syphilis screening in the antenatal care: a cross-sectional study from Botswana

Version: 4 Date: 26 June 2006

Reviewer: Ornella Lincetto

Reviewer's report:

General
I read the revised article and it has been improved a lot both in clarity and in language. In my opinion it can be published without further revisions.
The article is important in the field of public health and reproductive health.
I confirm that I don’t have competing interests in relation to the article.

-----------------------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-----------------------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-----------------------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

-----------------------------------------------------------------------------------------------------------------------------------

What next?: Accept without revision
