Reviewer's report

Title: Syphilis screening in the antenatal care: a cross-sectional study from Botswana

Version: 4 Date: 20 June 2006

Reviewer: Saiqa Mullick

Reviewer's report:

General
I have reviewed the resubmission of the Romoren and Rahman paper and the reviewers comments and fee that the authors have addressed the issues raised satisfactorily. The paper has improved considerably in its content and relevance and I have no further suggested revisions except a minor editorial comment (accent on RESULTS title which should be removed).

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)
