Title: Community views about routine HIV testing and antiretroviral treatment in Botswana: signs of progress from a cross sectional study

Version: 4 Date: 7 December 2006

Reviewer: Shan Naidoo

Reviewer's report:

General

---------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

---------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

---------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

I suggest that consideration be given in explaining how informed consent was asked for and given. This may be important to other researchers who embark on similar research!

What next?: Accept without revision

Level of interest: An article of importance in its field
