Reviewer's report

Title: Community views about routine HIV testing and antiretroviral treatment in Botswana: signs of progress from a cross sectional study

Version: 5 Date: 26 February 2007
Reviewer: Hilary Curtis

Reviewer's report:

General

1. A valuable report on high levels of awareness and support for RHT and ART in Botswana.

-------------------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

None.

-------------------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

2. There appears to be a typo in the third sentence under "Perception of HIV risk and HIV testing" - says "in the last 21 months" but I believe this should be 12 months.

-------------------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

None.

What next?: Accept after minor essential revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
