Reviewer's report

**Title:** Methamphetamine use and correlates in two villages of the highland ethnic Karen minority in northern Thailand: a cross sectional study

**Version:** 3 **Date:** 25 March 2009

**Reviewer:** Wendee Wechsberg

**Reviewer's report:**

The authors wrote a lengthy response, actually longer than the paper itself however they did address my concerns and have revised the paper adequately. It is not the strongest research but valuable because of its rare nature. I would accept this paper.
