Title: An integrated approach of community health worker support for HIV/AIDS and TB care in Mozambique

Version: 2 Date: 13 May 2009

Reviewer: Emmanuel Nwabueze Aguwa

Reviewer's report:

Major Compulsory Revisions: None

Minor Essential Revisions:
-Discussion:
Line 3: Change "Fist" to "First"
Lines 10 -11: "Second, since members are chosen by the community, they tend to be better respected and accepted." This statement is unnecessary since you are comparing present Community Health Team (CHT) approach and previous vertical Community Health Workers) CHW. It is only necessary if you indicate that previously CHW were not chosen by the community while as CHT they are now chosen by the community.

Author contributions:
Line 2: Remove "ipated"

Table 1: Indicators - "Success rate". Does this data mean successfully cured or completed treatment. Please make the phrase to be self explanatory

Table 3: Should be titled: "Main achievements of two of the CHT". (See Lines 2-3 of "Overview of achievements" in the text).
