Reviewer's report

Title: A randomized controlled trial investigating the impact of different modes of vitamin B12 supplementation over subclinical vitamin B12 deficiency on sensory, motor and cognitive function among older people living in Santiago, Chile. A study protocol [ISRCTN 02694183].

Version: 1 Date: 16 May 2011

Reviewer: Robert Clarke

Reviewer's report:

I think the authors should look at the (1) primary and secondary end-points; (2) comparison with other B-12 trials, including the OPEN trial and (3) reconsider the policy implications.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
