Reviewer's report

**Title:** A cluster randomized controlled trial investigating the impact of different modes of vitamin B12 supplementation on neuroconduction and cognitive function among older people living in Santiago, Chile. A study protocol [ISRCTN 02694183].

**Version:** 2  **Date:** 6 August 2011

**Reviewer:** Mary Ann Johnson

**Reviewer's report:**

The manuscript is improved and my concerns were addressed.

The "minor essential revisions" are for general editing, grammar, and punctuation; I did not provide a list of these.

**Level of interest:** An article of importance in its field

**Quality of written English:** Needs some language corrections before being published

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

None.
