Reviewer’s report

Title: Association between Eating Behavior Scores and Obesity in Chilean Children

Version: 2 Date: 12 September 2011

Reviewer: Victor Viana

Reviewer’s report:

The authors answered to my reserve. I think it is important to put in the text, possibly in chapter "CEBQ factor structure" the information about the number of subjects (n=294) included in Factor Analysis of the questionnaire. Specially because that number of subjects was the sum of subjects in the "case-control study" (N= 250) with those in the group of "overweight children" (n=44).

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
