Reviewer’s report

Title: Characterization of Street Food consumption in Palermo: possible effects on health

Version: 2 Date: 2 September 2011

Reviewer: Kylie Smith

Reviewer’s report:

The authors’ have made a good job addressing my previous comments. I think the paper is now acceptable for publication.

Two minor revisions I would suggest are:
Number the tables in the Appendix, and
Fix the labelling of the Y-axis in Figure 3 (BMI is written twice).

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
