Reviewer's report

**Title:** Use of a food frequency questionnaire to assess diets of Jamaican adults: validation and correlation with biomarkers.

**Version:** 1  **Date:** 23 November 2010

**Reviewer:** Raquel villegas

**Reviewer's report:**

the manuscript is very well written and interesting. However, the authors only assess the validity and reproducibility of the FFQ looking at nutrients between FFQ and recalls. I would like to see correlations between food groups as well. Also I would like to see a list of items on the FFQ. this could come as an appendix.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
