Reviewer's report

Title: Rye kernel breakfast increases satiety in the afternoon - an effect of food structure

Version: 1 Date: 19 January 2011

Reviewer: Anil Dutt D Semwal

Reviewer's report:

The information is worth publishing but needs some clarification with respect to few points and those indicated as below:

1. Rye kernel contains antinutritional factor (ANF) in present study ANF has not been analysed anywhere.
2. In the present study 1, Sample no. were 24 while in study 2 sample no. were 20 author should justify why the sample no. is varying as the rye kernel was used in both product.
3. Author should justify why the variation in rye grain structure influence perceived appetite has been checked during 8 hrs.
4. Editing is not proper. Whole text Allignment should be "JUSTIFIED." The font size of figures are not in same.
5. Uniformity in the reference section has not been maintained, it needs corrections.
